

Meeting Agenda

Training Tracker (TT) : Effective Workout Progress Monitoring
through Visual Analytics
Empowering Motivation with a Visual Fitness Performance Tracker

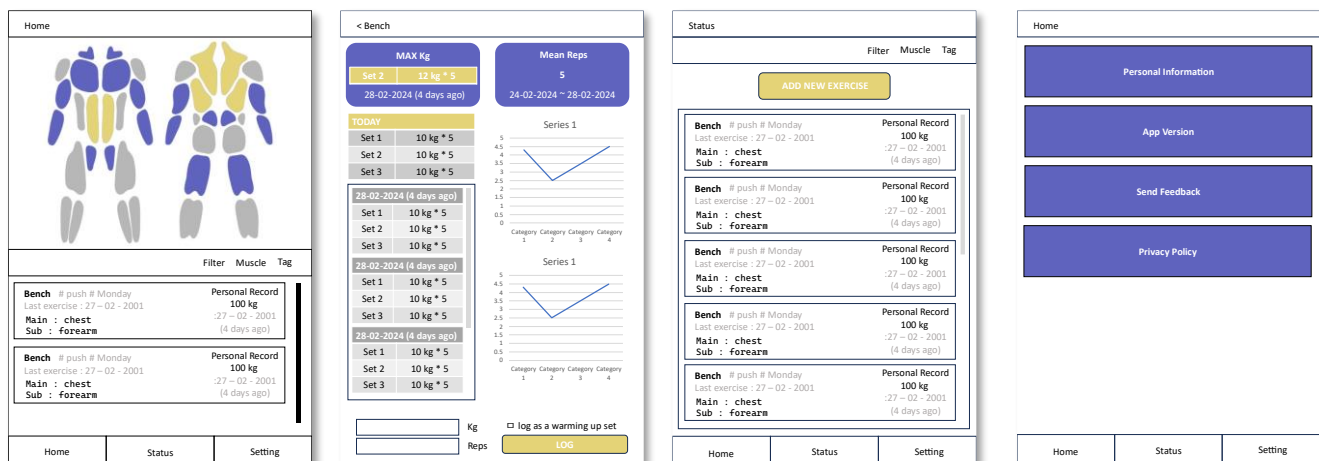

date | 12 - 03 - 2024 (10 : 30)

discussion topics

- * still waiting for ethics approval..
- * 19th Mar 14:30 meeting / 16th April 10:00 meeting

weekly updates

- * made the developer account
 - * implementing the second version of the app
 - click card to enter log
 - improved card layout
 - show the past records and the personal best record
 - show analysis of the progress (graph - still need to connect it to user's data, but frontend implementation is done)
 - muscle visualisation (still need to work on colour change features, but I've done visualisation each muscle with vector graphics, used "inkscape")
 - designed app logo
 - Find some errors and fixed (about data structures and classes)
 - enhancing user experiences
- (minimalise steps that user needs to take to log their progress, user can customise set recording, long click to delete a card with warning)

priority tasks

- * finalising the second version of the app
- * Upload app on google app store
